# Godox Octa. Softbox

- 120cm / 47.2in in diameter, inside with reflect silver.

- Ultimate soften light stream and remove shadow to make perfect shooting.

- Comes with front translucent cover that is sewn with Velcro around the edge, great for speedlite.

- Zippered design makes it easy to install the soft box on the stand.

- Can be used with flashes and some studio flash lights with umbrella hole.

# Rectangular Softbox 120

- A softbox is an enclosure around a bulb comprising reflective side and back walls and a diffusing material at the front of the light.

- A soft box can be used with either flash or continuous light sources such as fluorescent lamps or "hot lights" such as quartz halogen bulbs or tungsten bulbs. If soft box lights are used with 'hot' light sources, the user must be sure the softbox is heat rated for the wattage of the light it is attached to in order to avoid fire hazard.

- The softbox offers soft accurate, even, bright, smooth lights you need for shooting a perfect image. Skin tone come to be much alive and blemishes fade away. Colors pop and your shots can go to new levels of professionalism with a good softbox.

# Rectangular Softbox 60

Good for all types of photo work, the softbox renders a soft, flattering quality of light with open shadows and manageable contrast. The included fabric grid attaches to the front of the softbox via touch-fasteners. The grid provides directional control of the output, keeps light off the background, and allows you to light specific areas of your subject.

# 3 Godox Dp400ii Flash Head

The dp400ii flash head from godox is a full-featured 400ws monolight with several professional and convenience features. The head has a color temperature of 5600k, a recycle time of 0.3-1.2 SEC, and flash durations from 1/800 to an actionstopping 1/2000 SEC. Power is variable from 1/16 to full power, while the dp400ii's 150w modeling can be set to a percentage or proportional to the flash power to allow you to accurately preview your final shot. All of these functions can not only be made manually on the unit, but also wirelessly via the head's built-in wireless X system receiver. Remote operation requires separate purchase of a transmitter. The xt16 and FT-16 remote controls provide wireless control of power, modeling light, and ready beep signal. The dp400ii has a bowens front accessory mount that makes it compatible not only with godox light shapers, but with those made by the many manufacturers who use this mount.

With built-in Godox wireless X system, DPii-series studio flashes offer build quality, fine control on flash power, and stable flash output. Additionally, they fit a wide-range light shaping accessories in the market.

## Benefits

Built-in wireless system to control flash power, on/Off, modeling lamp, and beep indicator (Requires optional transmitter)  
1/16-1/1 flash power control. 150w modeling lamp bowens front accessory mount anti preflash (For single preflash cameras)  
Auto recovery of adjusted settings after restart

# Godox X2-F TTL Wireless Flash Trigger

- Compatible with Fuji TTL
- 2.4GHz TTL wireless transmission
- High Speed Sync up to 1/8000 sec
- 328.1' wireless range
- 5 groups, 32 channels

# Apple iMac 27-inch

Apple iMac MMQA2LL/A desktop is fast and intuitive.

This Apple iMac desktop has a thin edged, 21.5inch, FHD screen.

The Apple iMac MMQA2LL/A Desktop delivers an excellent userfriendly experience. It is loaded with a powerful internal system that comprises a 2.3GHz Dual-Core, Intel i5 processor and 8GB RAM, which together make the desktop perform each action at breakneck speeds.

# Studio Backdrops

This white, 10 x 20' Muslin Backdrop is an ideal size for large products, full length portraiture, and groups. It has two sewn in channels that slide over the Photoflex BackDrop Pole or other background support system. Both sides are usable and the muslin fabric is color-fast and can be washed on gentle cycle.

Available in 3 colours
